

NO SWEATING, NO RUST: HYGIENE IN THE CLEAN ROOM

Posted on 04/02/2022 by Peter Birchler

Choosing the right technical components is also of great importance for ensuring impeccable hygiene in production.

Top-Notch Hygiene in Production

The pre-insulated plastic pipes from [GF Piping Systems Switzerland](#) for cooling injection molding machines also impressed us from an environmental perspective: high energy efficiency thanks to low thermal conductivity, as well as lower CO2 emissions during production. A clean and, above all, durable solution.

Read the reference case study to learn how GF Piping Systems Switzerland installed the Cool-Fit plastic piping system while operations continued:
